

Harrow Offices Move

Sefas Innovation is pleased to announce the opening of a new set of offices in London, England. Based in the Borough of Harrow, the offices provide a welcome new base for Sefas' growing operations throughout the UK and Northern Europe.

Founded in 1991, Sefas' first offices were set-up in Paris, France. As the business grew and demand began to rise, subsidiaries were set up in Bristol (UK) and Burlington, Massachusetts (USA).

International and regional successes have ensured that Sefas' growth has continued and the new offices in London are seen as the next incremental step as we seek to continue our successes in the foreseeable future based in one of Europe's financial capitals.

Giles Hill, GM/MD of Sefas UK said that the offices " *will allow our sales and technical staff to have a base far closer to a number of our customers in the South East and will be a hub between Bristol and Paris for the pan European pre-sales and consultancy organisation.*"
